# Benefits

# Benefits

Express Parcel International, LTD dba EPISCS is the most powerful, transportation cost management platform ever built with the following benefits for your business.

**Full transparency.** Express Parcel International, LTD dba EPISCS delivers maximum transparency on cost savings reports. A screenshot for every refund secured is viewable inside your account, along with a log of actions taken by Express Parcel International, LTD dba EPISCS to secure savings. Competitors only show a summary of savings by type and reports are delivered as confusing spreadsheets that lack important details.

**Advanced analytics.** Transportation managers often rely on complex and static spreadsheets to visualize transportation cost data. There's a better way. The Express Parcel International, LTD dba EPISCS system utilizes the best big data and business intelligence tools in existence to give you a 360° view of transportation data.

**Automatic savings.** Express Parcel International, LTD dba EPISCS highlights new cost-saving opportunities for your business by benchmarking data and assessing current shipping spend. Automated tools work together to deliver savings back to your business without any additional work on your end. You remain focused on your core business while Express Parcel International, LTD dba EPISCS works in the background.

**Scalability.** Designed for the needs of even the world's largest companies, Express Parcel International, LTD dba EPISCS offers multiple products designed to scale with your business all in one powerful package.

## **Carrier Agreement Optimization**

*Deserved discounts delivered*

The tools most experts use in the modeling process are vlookup and if-then functions in Excel. There's a better way.

Express Parcel International, LTD dba EPISCS speeds up the process with sophisticated technology that simulates multiple agreements, across multiple carriers within a single modeling dashboard. See the financial impact of any change in a pricing agreement more clearly, make better decisions faster and pen the best carrier agreement for your company.

## **Proof of Delivery**

*One place for all proof of signature documents*

Everything about the workflow for obtaining proof of delivery documents from carrier websites is terrible. The websites are slow, don't work and are generally not intuitive. Gross. There's a better way.

Express Parcel International, LTD dba EPISCS is the faster, more dependable, single source proof of signature solution. Get proof of delivery documents from all carriers in a single location.

## **Carrier Agreement Compliance**

*Keep carriers accountable*

Carrier Agreement Compliance evaluates each line item on carrier invoices for rate accuracy. This includes transportation charges, discounts, incentives, accessorial charges, and more. Mistakes are common and affect 1-2% of all shipments. This automated process accounts for all parts of a pricing agreement including earned discounts, rate caps, and minimum charge reductions. Express Parcel International, LTD dba EPISCS ensures the carrier is honoring the negotiated rates.

## GL Coding

*Prepare for the future of finance with freight GL Coding*

GL Coding by Express Parcel International, LTD dba EPISCS automates even the messiest invoices with the most complex GL Coding requirements. High-volume shippers have a large number of accounting codes for freight expenses and multiple fields are required to code invoices correctly. If even a single piece of information is entered incorrectly, proper coding is thrown off, and the default cost center increases. Express Parcel International, LTD dba EPISCS uses *Linked Rules* to route exception shipments seamlessly. Put the cost accounting of shipping invoices on autopilot.

## **Transportation Analytics**

*Deep and actionable insights*

Competitors often rely on complex manual data manipulation and static spreadsheets to share transportation data. Cloud-powered analytics by Express Parcel International, LTD dba EPISCS make it easy to generate interactive visualizations, perform ad-hoc analysis and receive accurate, real-time transportation insights. The tool is designed to scale, allowing multiple people to simultaneously analyze trends and expense drivers like fuel surcharges, accessorials, zones, mode shifts and weight classes.
